

SAASPASS is your key to the world. By providing a comprehensive and frictionless solution fully-secured with dynamic passcodes and multi-factor authentication, SAASPASS is the only identity and access management tool you need to secure your corporate network or your own personal data.

Overview: SAASPASS is a two-factor authentication solution that replaces static passwords with encrypted images and Proximity (wireless BLE) waves to use dynamic, ever changing credentials that can Unlock Computers, Doors or login to Websites and Cloud Applications

Why do I need SAASPASS?

SAASPASS is the only full-stack identity and access management solution. With a single product, it allows you to use your mobile phone or other enabled device to manage all your digital & physical access needs securely & conveniently. Without this convenience, you aren't truly secure.

Benifits

- ☞ Computer Access Security
- ☞ Remote Desktop Program (RDP) Support
- ☞ Physical Access Control Systems - PACs
- ☞ Endpoint Access Management
- ☞ Enterprise Multi-Factor Authentication
- ☞ Secure Single Sign-On (SSO)
- ☞ Password Manager
- ☞ Sharing Center & Access
- ☞ Multiple Login Methods
- ☞ Standalone Authenticators
- ☞ Mobile App Authentication
- ☞ Mobile Web Authentication
- ☞ FIDO U2F & Hard Token Support

Features

- ☞ Control and instantaneously manage network access by employees and partners
- ☞ Eliminate the manual typing of passwords and the resources involved with password complexity rules and resets
- ☞ Replace ID cards, single sign-on products, and password managers with a single, easy-to-use solution
- ☞ Secure every access point to your corporate network, personal data, physical door, or IoT device using out-of-band MFA with dynamic passcodes
- ☞ Login to your Mac or PC instantly, with full MFA, even when offline
- ☞ Authenticate to cloud-based and on-premise apps securely and seamlessly
- ☞ Eliminate password & data breaches and their impact on you or your organization
- ☞ Eliminate the costs & risks of purchasing and managing security tokens & hardware
- ☞ Minimize admin resources by streamlining the provisioning and deprovisioning of employees and temporary partners to your active directory and corporate apps
- ☞ Repurpose existing tokens by integrating with SAASPASS
- ☞ Replace legacy hard tokens with FIDO U2F tokens
