

**Overview:** Complete data center transformation, server consolidation, and server migration projects blazingly fast. Get minimal downtime and maximum automation with PlateSpin Migrate.

PlateSpin Migrate is the IT pro's go-to solution for cloud and data center server migrations, using high-speed block-based transfers and Server Sync technology to deliver the fastest and most efficient anywhere-to-anywhere migrations. Migrate your servers to and from physical, virtual, and cloud locations.

PlateSpin Migrate is a workload portability solution that automates the movement of server workloads-operating systems along with their applications and data-over the network between physical servers, virtual hosts and image archives. PlateSpin Migrate remotely decouples workloads from the underlying server hardware and streams them to and from physical or virtual hosts, all from a single point of control.

### Highlights

☞ **Faster, more reliable migrations:** Accelerate server migrations & reduce errors with the highest level of automation available in a migration solution. It's a simple way to free up IT resources for other tasks.

☞ **Integrated testing for safer migrations:** Only PlateSpin Migrate recognizes the need for testing as an important key to success and includes testing in every server migration job.

☞ **Multi-platform support:** Perform anywhere-to-anywhere migrations to-and-from physical servers, virtual hosts, and cloud platforms. PlateSpin Migrate offers broad support for 32- and 64-bit Windows and Linux operating systems.

### Features

**Full automation:** ☞ Faster, more reliable migrations ☞ Cohesive planning and execution ☞ On-the-fly configuration

**Risk-free migrations:** ☞ Integrated testing for safer migrations ☞ Fast incremental replication ☞ Migration speed and scalability ☞ Live transfer ☞ Role-based access

**Broad support for platforms, operating systems & hardware configurations:**

☞ Multi-platform support ☞ Anywhere-to-anywhere server migration
