

Micro Focus Silk Performer is a proven, easy-to-use load and stress testing solution for optimizing business application performance. Accurate, realistic tests are easy to create, providing a simulation of as many users as needed, in a range of enterprise environments and platforms. The tests isolate issues and bottlenecks that could impact reliability, performance, and scalability. Intuitive diagnostic and analysis tools help resolve issues quickly, reducing test-and-fix cycles and accelerating time-to-market. To reduce costs further and increase testing for more people, Silk Performer removes the usage restrictions common in other solutions.
