Silk Test

MICRO FOCUS®

Overview: Micro Focus Silk Test is one of the most reliable, efficient test automation solutions for functional and regression testing of any software application. The ability to create automated tests without coding enables software testers to keep up with the pace of development, and developers to create tests in their choice of IDE. Silk Test's automation is effective for regression, cross-platform, and localization testing. It works across all technologies, including AJAX, web, mobile web, Java, .NET, client/server, terminal host, and SAP systems.

Companies face many challenges when designing successful testing strategies for their applications. Incomplete or flawed test data from inaccurate testing can cause application failure and widespread disruption. Building test environments can be labor intensive, expensive, and does not guarantee success. But companies compromising on testing risk losing customers and market share-potentially damaging their reputations.

Key Features and Benefits

☞ Silk Test for Selenium
☞ Mobile Testing
☞ Include All Users in the Testing Process, Regardless of Skill-Set
☞ Easy, Full Spectrum Support for Web Applications
☞ Cross-Browser Testing for Web Applications
☞ Configuration Testing in the Cloud
☞ Agile and Shift-Left Testing
☞ Support for Rapid Release Cycles

Supported Environments

Web: ☞ Browser technologies: AJAX (Angular, Knockout, React, ExtJS), HTML5, DHTML ☞ Web browsers: IE, Edge, Firefox, Safari, Mobile browsers on iOS and Android ☞ Rich internet applications: Apache Flex, Adobe Air, Silverlight, Java Applets, Oracle Forms (IE only)

Mobile: ☞ iOS ☞ Android ☞ Physical devices and emulators/simulators

Desktop: ☞ Java SWT Standalone and Rich Client Platform (RCP) applications ☞ Java AWT/Swing ☞ Microsoft WinForms (incl. 3rd party UI frameworks) ☞ Microsoft WPF (incl. 3rd party UI frameworks) ☞ Native Windows applications ☞ SAP (SAPGUI) and eCATT integration ☞ Oracle Forms ☞ Terminal Host Systems and Green screen applications via Micro Focus Rumba
