Vibe

MICRO FOCUS®

Overview: Brings people, projects and processes together in one secure place to enhance team productivity-no matter where the team is or what devices they use.

With Vibe, you can help your people be more productive, individually and as teams. A proven collaboration solution, Vibe gives your teams an easier way to work together. Instead of shifting between applications to collaborate, teams can share all of their information in one secure place that's easy for mobile users to access. With Vibe, users can collaborate on documents; chat with team members; capture lessons learned; and manage projects, calendars & task lists and much more.
Highlights

Build your intranet easily: Keeping your employees informed through an Intranet is one of the first steps towards business success. Augment or replace existing internal websites with a social and collaborative Intranet that improves users' awareness and contribution with Web 2.0 technologies.

Collaborate with teams effortlessly: Team workspaces let you create digital offices where local and global team members can gather online to coordinate their efforts and bring together the right information, resources, and skill sets for a project, purpose, or topic.

Tailor your digital workspace quickly: Personal workspaces let you create your own online work environment. Similar to team workspaces but customized to your own needs, personal workspaces give you control over private and public elements in your workspace.
