MICRO FOCUS ®

Overview: Only Micro Focus iPrint offers a single, scalable solution for managing all of your printing across multiple office locations from any device. Micro Focus iPrint allows users to print to your current printers from their desktops, laptops, and mobile devices.

People still print. Organizations still print. Yet printing can be a hassle. Fortunately, the Micro Focus iPrint virtual appliance simplifies printing. And with the release of Micro Focus iPrint 2, made printing even simpler.

Highlights

Simplified enterprise printing: Micro Focus iPrint reduces help desk calls and the complexity of printer setups by letting end users easily locate and install printers. It provides global access to printers, customizable views of any print environment, flexible print deployment configurations and easy, secure printing.

Mobile printing made end-user easy: Allow mobile device users to print wirelessly to your networked printers; directly, via simple "Open In" and "Share with" device technology, or by emailing an attachment to the Micro Focus iPrint server.

Self-service printing: Reduce help desk calls and increase productivity by empowering users to print to any of your organization's printers, no matter where your users are.

Email print jobs to any Micro Focus iPrint printer: Any email-enabled device can print to any Micro Focus iPrint printer by sending the print job in the body of the email or as an attachment.

Features

☞ **Save on printing expenses:** Reduce the clutter when you get multiple responses to any email. Mobilize your existing fleet of printers rather than buying new and implement print monitoring to track printing costs. With user self-provisioning of network printers, helpdesk expenses are reduced via fewer calls for printer help.

☞ **Leverage your current directory service:** Micro Focus iPrint can integrate with any lightweight directory access protocol (LDAP) source, such as Active Directory, NetIQ eDirectory, Micro Focus iPrint can authenticate your users to increase your print security. This means no matter what mobile device an employee wants to use, Micro Focus iPrint offers authentication to keep your organization's information secure.

☞ **Micro Focus iPrint Desktop:** Micro Focus iPrint connects all your organization's workstations to your current printers. It allows IT to set up a self-service printing environment in which employees can print on demand instead of calling IT with print-provisioning needs. Micro Focus iPrint works with your current users in Active Directory or Micro Focus eDirectory to provide authentication.
