

We are pleased to announce that we have collaborated with 2X to promote their range of products. 2X Software is a global leader in virtual application and mobile device management solutions. Many organization worldwide trust in the reliability and scalability of 2X products. 2X offers a range of solutions to make every organisation's shift to cloud computing simple and affordable.

Mobile Workforce With 2X Products – RAS & MDM

☞ Mobile Device Management (MDM):

2X Mobile Device Management is an easy way to manage, secure, track and control mobile devices. With 2X MDM, you are able to enforce Bring your own device(BYOD) policies to mobilize your workforce in a secure way.

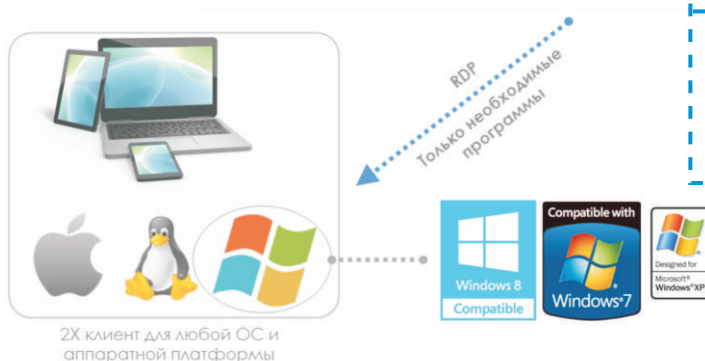

☞ Remote Application Server (RAS):

2X Remote Application Server is an integrated solution to virtualize your applications, desktops and data. 2X RAS publishes applications and delivers Remote Desktops and VDI to any device in your network, anywhere. 2X RAS is easy to install and to maintain, and significantly reduces your Total Cost of Ownership compared with other solutions.

Mobile Device Management

Remote Application Server

Bring your own device(BYOD)

Bring Your Own Device is a phrase that has become widely adopted when referring to employees bringing their own devices to their work place and connect to company resources such as Wi-Fi, corporate networks, Email accounts etc. This "scheme" has raised a number of concerns in both managing and also securing these devices.

Features
