G.T. Enterprises is happy to announce that we have tied up with EnterpriseDB to promote their range of products. EnterpriseDB is the only world wide provider of enterprise-class products & services based on PostgreSQL, the world's most advanced & independent open source database. EnterpriseDB was founded in 2004 with the goal of disrupting the database oligopoly with an equally capable productbased on open source principles and development that offered dramatic cost savings.
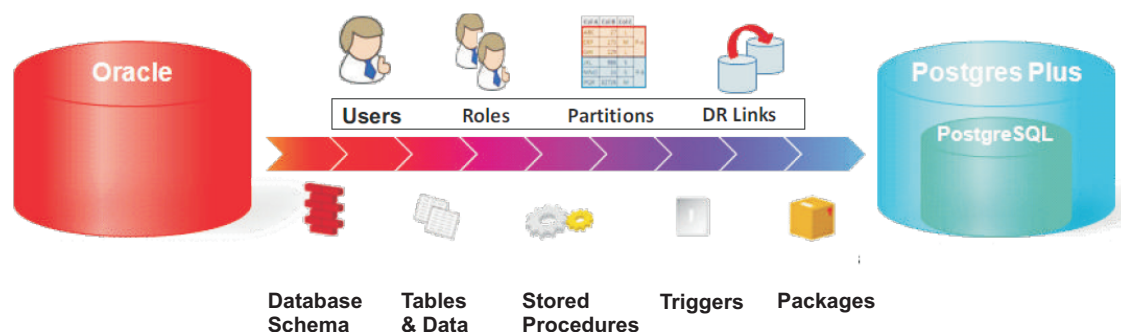

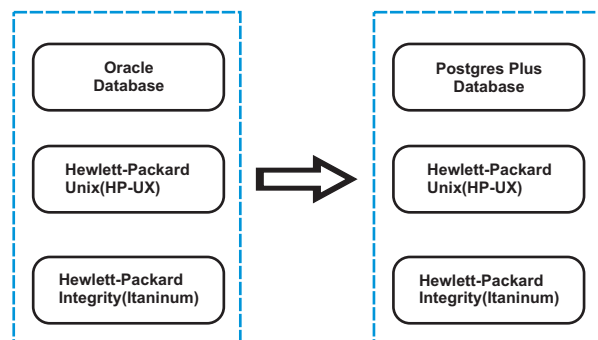

Postgres Plus Advanced Server includes:

☞ building new OLTP and operational applications.

☞ Applying it to a class of applications based on specific criteria(SLAs, data size, concurrent users, etc).

☞ Addressing archival or read-only applications that don't justify expensive licenses.

☞ Building non-mission critical applications.

☞ Assigning it to particular business units or departments.

☞ Offloading reporting tasks from a master database as an inexpensive replication server.

Postgres Plus Advanced Server®

Savings Potential

Database	POSTGRESQL	$$$$$
Middleware	JBOSS, APACHE	$$
Operating system	LINUX (RHEL, SUSE)	$$$
Virtualization	HYPERVISOR (XEN, KVM)	$

HP-UX Migrate Option Postgres Plus

Oracle Database → Postgres Plus Database

Hewlett-Packard Unix(HP-UX) → Hewlett-Packard Unix(HP-UX)

Hewlett-Packard Integrity(Itaninum) → Hewlett-Packard Integrity(Itaninum)

Oracle → Postgres Plus PostgreSQL

Users   Roles   Partitions   DR Links

Database Schema   Tables & Data   Stored Procedures   Triggers   Packages

Oracle Compatibility with Postgres Plus Advanced Server
