

G.T. Enterprises is delighted to announce that we have tied up with MongoDB to promote their range of products. MongoDB can help you make a difference to the business. Tens of thousands of organizations, from startups to the largest companies and government agencies, choose MongoDB because it lets them build applications that weren't possible before. With MongoDB, these organizations move faster than they could with relational databases at one tenth of the cost.

MONGODB Use Cases

Single View:
Real-time views of your business that integrate all of your siloed data.

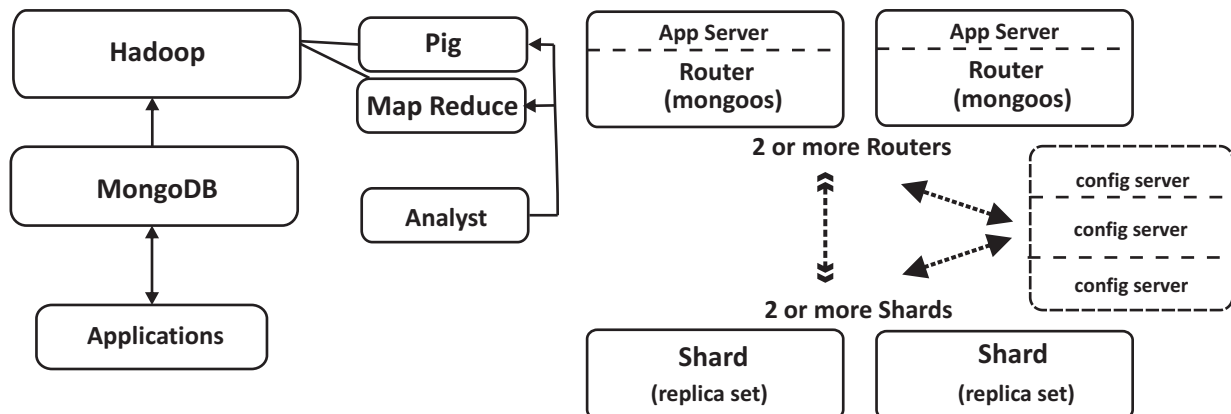

Real-Time Analytics:
Lightweight, low-latency analytics. Integrated into your operational operational Database in realtime.

Content Management:
Store and serve any type of content, build any feature, serve it any way you like. From a singal database.

Mobile:
Ship killer mobile apps in weeks, not months. Scale to millions of users. Easy with MongoDB.

Internet of Things:
40 billion sensors. \$19 trillion in revenue. You're gonna need a bigger database.

Personalization:
Greet your customers like old friends – so they'll treat you like one,two.
