Ranorex®
An Idera, Inc. Company

We are pleased to announce that we have collaborated with Ranorex GmbH to promote their range of products in India. Ranorex products are unique Software Test Automation Tools, this Tool does not use the conventional scripting language of its own. Instead uses standard programming languages such as C# and VB.NET as a base, because of this unique feature Ranorex can be easy-to-use by Testers for Test Planning , Execution , Reporting and Developers can also use for Software Developement CodeAnalysis, Bug fixing , Unit Testing and Continuous Integration.

Features

☞ Easy-to-use test automation tools
☞ Seamless Integration
☞ Robust Test Automation
☞ Flexibility with a Professional API
☞ Increased Test Speed, Test Efficiency and Software Quality
☞ UI Testing with .NET and Visual Studio
☞ Desktop, Web and Mobile App Test Automation

Benefits

☞ Record, Replay & Edit User Actions
☞ Broad acceptance
☞ Quick ROI
☞ Decreased Costs and shorter Time to Market Increased Confidence
☞ Greater Test Coverage

Why Ranorex

Ranorex Studio offers easy-to-use test automation tools for developing & managing test automation projects. Optimize the creation of robust test automation frameworks with Ranorex Studio - for testing of any desktop, web or mobile application.
A major necessity for a successful test automation project is the accurate recognition and unique identification of user interface objects. Ranorex´s excellent GUI object recognition makes it easy to handle dynamically built user interfaces using the powerful RanoreX Path identifier.

Ranorex Recorder is a very simple approach to create automated test steps for desktop web and mobile applications right from the start.

Ranorex does not involve a proprietary scripting language. Within the test development environment of Ranorex Studio, testers create flexible automation test suite projects based on the Microsoft .NET frameworkbut without the need for programming using Drag & Drop functionality instead.

Ranorex test report files are XML based. They are generated during test execution and reduce the time needed to determine what went wrong. Ranorex reports are directly connected with Ranorex Spy and Ranorex Object Repositories.
