SOFTWARE ROBOTICS

We are pleased to announce our collaboration with Servicetrace to promote their range of products. Servicetrace has been developing innovative Robotic Solutions for 15 years – entirely "made in Germany". As early as 2004, they were among the first to start developing software robots and automation solutions. Servicetrace is among the top 3 RPA vendors in Gartner's critical capability report.

The Software robotic solutions are: **Application Performance Monitoring**, Robotic Process Automation, Software Test Automation.

WHY CUSTOMERS CHOOSE SERVICETRACE E2E MONITORING

Servicetrace software robots operate your business-critical applications just like your employees and customers: They identify content on the screen, click on elements and type characters.

Intelligent Recognition: Smart image and text recognition by servicetrace. Patented technology that recognizes images and text like the human eye. image recognition and OCR technology is based on human vision .

Secure Operation: Servicetrace's product delivers a secure environment for running automation Services run on a user's desktop or hidden in the background. The entire environment is secured by strong encryption.

Easy Automation design: Drag, drop, automate. Software robotics solutions make the automation of digital processes as easy as possible for our users and with fast results.

Scalable Process Automation: Cost-efficient scaling through parallel sessions on one end device or virtual machine.

SYNTHETIC MONITORING WITH SOFTWARE ROBOT

☞ 24/7, at locations worldwide.

☞ Provides a crystal clear view on application performance from the user's perspective.

☞ Alarms poor performnce values immediately to service responsibles.

☞ Resolves standard performance problems automatically.

☞ Provides detailed SLA reports for your service level management.
